The applicants' response, which is a second response, filed 09/12/2010 under 37 CFR 1.116 in reply to the final rejection made on 05/21/2010 is considered but it is not entered as the amendment to claims does not place the application in condition for allowance for following reasons.

In response to Final rejection made on 05/21/2010, applicant filed an After-Final response, cancelling all pending claims 1-49 and adding new claims 50-67. Examiner did not enter these claims and provided the following reasons:

Although cancellation of claims 36-49 and addition of new claims 50-67 renders the 112 second paragraph rejections made in the previous office action moot, the 112 first paragraph rejection remains and will be applied to currently pending claim 50 and its dependent claims 51-67. In addition, claim 50 indefinite and its dependent claism 51-67 are indefinite as claim 50 lacks definition of R1-R6 groups and hence the structural make-up of reactant triazine carbamate II and product triazine carbamate I remains unknown. Furthermore, claim 56 is indefinite as it is not clear what is intended. In addition, If the product as recited has the lowest boiling alcohol R1OH, R2OH, R3OH, the reaction of triazine carbamte II bearing highest boiling alcohol is not likely to be displaced by the lowest boiling alcohols. Hence, claim 56 raises additional 112 first paragraph issues.

Currently presented claims 50-67 are amended claims. Yet they do not address the 112 first paragraph rejection or obivate the rejection. The amended claims stll raise the same 112 first paragraph issue. Furthermore, they also raise additional 112 issues.

For example, claim 50 recites, "reacting the 1,3,5-triazine carbamate of formula (II) at a temperature of 40 to 120°C with an alcohol of the formula R³OH and, optionally, with an alcohol of the formula R²OH and/or R¹OH to produce the 1,3,5-triazine carbamate of the formula (I) and an alcohol of the formula R³OH and optionally an alcohol of the formula R⁴OH if Y¹ is a group of formula - (CO)-O-R⁴ and/or an alcohol of the formula R⁵OH if Y² is a group of formula - (CO)-O-R⁵..."

It is not clear why and how one would obtain an alcohol of R<sup>3</sup>OH by reacting the carbamate of formula II, which bears only the radical R<sup>6</sup> of R<sup>6</sup>OH.

See also claim 62, which recites separation of R<sup>3</sup>OH by distillation.

Also note given the choice of range of alcohols in claim 50, it is not clear how one can distill off R<sup>3</sup>-OH.

Also note R<sup>3</sup> can have a poly,merizable group and heating to distill this alcohol is likely to result in polymerization. Furthermore, any heating of the reaction in presence of choosen catalyst can also degrade the carbamate group to isocyanate thereby permiting trimerization.

Furthermore,  $R^1OH$ ,  $R^2OH$  and  $R^3OH$  are also permitted tobe a C4-alcohols such as n-butanol, sec-butanol, isobutanol and tertpbutanol and the same choice of alcohols are embraced in  $R^4OH$ ,  $R^5OH$  and  $R^6OH$  when they are  $C_4$ -alcohol,  $R^5$  and  $R^6$  are  $C_4$ -alkyl.

In addition claims 57-61 and 66 are improper dependent claims as they permit variation of R<sup>3</sup> radical or R<sup>3</sup>-OH. Claim 50 on which claims 57-61 and 66 are dependent,

recites specific alcohols and not a generic calss of alchols. Hence claiming a genus of generic alcohols in claims 57-61 and 66 improper and is outside the scope of claim 50.

Hence, the newly presented claims 50-66 are not entered. The rejections made in the office action, dated 05/21/2010, are maintained.

## Conclusion

Any inquiry concerning this communication from the examiner should be addressed to Venkataraman Balasubramanian (Bala) whose telephone number is (571) 272-0662. The examiner can normally be reached on Monday through Thursday from 8.00 AM to 6.00 PM. The Supervisory Patent Examiner (SPE) of the art unit 1624 is James O. Wilson, whose telephone number is 571-272-0661. The fax phone number for the organization where this application or proceeding is assigned (571) 273-8300. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (571) 272-1600.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAG. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <a href="http://pair-direct.uspto.gov">http://pair-direct.uspto.gov</a>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-2 17-9197 (toll-free).
